

Product: Docking Dissecting / Embalming Table, (mobile) Cat.-No.: MA-0974

Docking Dissecting- / Embalming Table

Mobile, with perforated work area and sidewall downdraft extraction

Type: 0974.0

Description

Docking embalming- / demonstration- / dissecting-table, mobile design. With perforated work area, sidewall downdraft extraction (must be connected to a docking station MA-0970 (single) or MA-0971 (double) and the in-house air extraction system).

Especially used for embalming in anatomy incl. the "PerfuTek" perfusion system and for demonstration of forensic cases.

Newly designed concept for odour free mobile body preparation and embalming.

Features

The upper part of the table is constructed like a large sink, where the detachable 4-part perforated worktop is placed on. It contains a drain sewer with a sieve. The bottom of the plenum contains no opening for extracted air! At two sides of the plenum-walls a double slot system was incorporated, which guarantees an effective and equal extraction over the complete length of the body. The actual extraction is provided by an external fan or an in-house extraction system.

The air is extracted through the extraction tube below the plenum which will be docked to the opening of the docking station. The underside of the double floor plenum is noise dampened. The 4-part perforated work area is delivered with 2 finger holes and a sturdy stiffening. The complete top of the table contains a double wall and double bottom.

There is no sink present. However, the sink is located in the docking station plus all other supplies and waste lines plus the warm / cold water knee operated valve. Also the flexible shower with 3m hose, which maybe fixed in the centre of the organ sectioning table (accessory) for optimum wash down purposes over the whole length of the body.

The docking station contains 2 revision doors for easy access in case of service and the sanitary installation.

MA-0974 Student dissecting / demonstration table with perforated work area and downdraft extraction. Docked to single docking station with sink

MA-0971 Double Docking Station for two dissecting tables

MA-0970 Single Docking Station for one dissecting table

Product Specification gfw

Technical Data

Material: stainless steel EN / DIN AISI306 double polished
Sink: no sink
Dim. mobile autopsy table: 2060(L) x 900(W) x 850(H)mm
Weight: 195kgs
Necessary extraction volume: appr. 1200 m³ / h constant
Duct hose from the floor: 200mm dia.
Castors: 4 with breaks and "hospital tyres" incl. 1 castor with fixing position for straight running

Country of Origin

Manufactured by MEDIS MT GmbH in Germany acc. to EN and German norms and the health & safety regulations of the EC and Germany!
