

Product Specification

Product: Scissor Type Hydraulic Body Lifter, electric adjustable with digital scale

Cat.-No.: MA-1271

Scissor Type Body-Lifter 1900 with electrical height adjustment and integrated digital body scale

Type: MA-1271

Description

Sturdy body lifter with electrical height adjustment. For body lifting at body fridges and body deep freezers and the automatic loading of the body cells.

One-man operation. Especially developed for the lifting of bodies into the compartments of the body fridges.

Incl. 2 x U-shaped transfer rails for accommodation of a transfer body tray with 8 small wheels and fixation mechanism of tray.

U-shaped rail with docking guide for body fridges.

Solid construction with scissor type mechanics and special frame construction for highest loading. Max. load: 400kg.

4 easy turning wheels with bearing will assure best and easy operation / maneuverability. 2 wheels have a foot break system. Wheels in trackless rim construction for use in hospitals (no black rubber trails).

Detachable push handle fastened at lower frame.

Handle height appr. 950mm. Plastic wall bumpers at front.

Power independent operation due to low voltage battery operation.

Height adjustment per foot switch. Rechargeable battery with visual battery loading display and acoustic alarm at "low battery situation".

Complete coverage of the lifting mechanism and battery unit.

Complete transporter in "IP 65" splash water protected design.

Integrated push handle mounted digital body scale: 300kgs max.
