

Product: Preservation Tank for 6 Corpses (3-tier)
Cat.-No.: MA-1338

Preservation cuvette (tank) for 6 corpses incl. body tray insert with airtight lid

Use: human anatomy

Type: 1338

Description

Preservation tank for 6 (2 x 3) whole body preparates and extremities for student education. Stationary version. Stable fixation and preservation container with gas-tight lid.

Easy opening of the lid by electr. crane rail with adjustable lifting and lowering speed.

Tanks must be inserted in a floor opening, so that the loading / unloading can easily take place at a optimum height. The height of the ceiling must be adapted to the height of the insert including crane.

Circumferential Viton seal (15mm thick) for gas tight seal. Drain ball valve at front (bottom). 4 height adjustable feet for optimum alignment. Lower part for an insertion of a forklift approx. 630 mm wide. Cuvette was designed for storage up to 6 corpses on a body tray. Loading / unloading is done by a crane. The loading / unloading lifting speed can be selected.

Lid welded to frame - sealing profile inside the lid. Two black plastic slide guides to avoid sticking, each centered at the insert. Delivery includes 2 containers for dividing the extremities or organs.

Specifications

Material: stainless steel 1.4571 (AISI 316) DIN EN double polished for all parts

External dimensions: 2200 (L) x 1520 (W) x 1600 (D) mm
