

Product: Universal Body Transporter with electronic height adjustment from 600-1200mms

Cat.-No.: MA-2010

Universal Body Transporter with electronic height adjustment per remote control and roll on / roll off body tray

Type: 2010

Description

Sturdy body transporter with electronic height adjustment. For all body transports in the clinic, especially from the ward to the pathology dept. and the automatic loading / unloading of bodies from the body cells as well as the PABH system autopsy and preparation tables with transfer work area.

One-man operation. Especially developed for the takeover of the bodies from the ward for transport to the pathology department with direct insertion possibility into the body fridge.

Features

Incl. 2 x U-shaped transfer rails for accommodation of a transfer body tray with 8 small wheels and fixation mechanism of tray. Solid construction with one double stroke column and special frame construction. Max. load: 400kg.

4 easy turning wheels with bearing (dia. 180mm) will assure best and easy operation / maneuverability. All 4 wheels have a foot operated break system. One wheel maybe supplied with a straight drive mechanism for better track holding. Wheels in trackless rim construction for use in hospitals (no black rubber streaks).

Detachable push handle fastened at lower frame (950mm high). Plastic ram protectors at front. Power independent operation due to low voltage rechargeable battery operation.

Height adjustment per remote control. Rechargeable battery with visual battery charge display and acoustic alarm at "low battery" situation.

Complete coverage of the lifting mechanism and battery unit. Complete "IP 65" splash water protected design.

Technical Data

Material: All parts made of stainless steel EN/DIN 1.4301, double polished
